25X1

1. A crude oil pumping station in Baicoi is located at the 20 kilometer marker of the Ploesti-Campina road. The station has one main and two auxiliary pumps and five tanks for the storage of crude oil. All crude oil from Baicoi, Floresti, and Moreni goes through the main plant. The power is furnished by the Floresti power station.

2. The main pumping station is a three story building, about 35 by 20 meters in size, with a peaked roof. It has an undetermined number of electric pumps. The oil is pumped to the Ploesti refineries.

3. One auxiliary station is in a building of corrugated sheet metal, 6 by 5 meters, with a circular roof. It is equipped with two electric pumps. The other auxiliary station is in a corrugated sheet metal building, 20 by 10 by 6 meters with a peaked roof. The number of pumps is unknown.

4. One storage tank is 35 meters high and 30 meters in diameter and the other four tanks are 25 meters high and 20 meters in diameter.

5. The guardhouse is about 7 by 4 meters with a tile roof. About 15 Rumanian soldiers are stationed there for guard duty. The pumping station is surrounded by a barbed wire fence about two meters high. Guards armed with submachine guns are posted as follows: one at the main pumping station; one at the storage tanks; and one at each of the auxiliary stations.
